# ARINDAL

The Arindal is a high-quality and high-performance loudspeaker that wholly embodies Verity's authentic values of quality, refinement and performance. It represents the quintessence of its predecessors based on advanced technologies. An astounding sound reproduction performance is achieved through its superior characteristics of efficiency, bandwidth, and dynamic range. The Verity designers are always challenging themselves to exceed all expectations and to respect every last detail in the creation of what we believe to be a tour de force.

The Arindal is a full bandwidth 3-way bass-reflex loudspeaker. Every driver was designed from scratch in a matter to reach elevated performance goals. Amongst all, the Arindal is equipped with a stunning tweeter, the fruit of the best soft dome design expertise. Its resonance-free characteristic allows an uncontaminated summation of harmonics revealing the richness of even the most complex sound textures. The midrange and woofer drivers are of an exceptional quality and value. The midrange uses a special-geometry mineral-filled polypropylene cone optimized for maximum cone rigidity, low energy storage and smooth breakup. The woofer driver houses a unique sandwiched carbon paper cone adding a superb degree of bass intelligibility. All drivers uses a generous ventilation system that minimizes voice-coil dynamic compression and only the best quality materials are used for lifetime reliability and accuracy.

The Arindal uses Verity's unique rear-oriented bass reflex tuning in order to produce an accurate and well-defined bass performance for all living environments.

The Arindal upper enclosure has a damped open-back loading that gives a clean and transparent midrange reproduction.

As with all Verity Audio loudspeakers, Arindal inherits the same anti-resonance cabinet construction accomplished through a dedicated array of inner reinforcements and complex-angled panels. The inner energy is properly dissipated by balancing the acoustical and mechanical impedance of each panel. Each component is carefully selected to blend perfectly in a truly high-performance loudspeaker.

The beautiful and unique cabinetry is uniformly lacquered on all sides. There are no visible joints and it is finished with nothing less than the most exquisite Italian lacquer. It comes in two separate cabinets that are isolated through a thick and damped aluminum platform. It is also equipped with the Verity Audio MASIS System (« Mechanical & Airborne Sound Isolation System ») to perfectly isolate the loudspeaker from the floor.

The Arindal loudspeaker will open up a world of sonic colors, a palette of nuances and details that will go far beyond your imagination. Your favorite music will no longer be about the songs anymore, but about the sound.

All Verity Audio designs are crafted with a balance of science and art. It is only through this tradition that the spirit of knowledge and craftsmanship comes alive. Discover the Arindal and live a once in a lifetime experience...

## ARINDAL

### SPECIFICATIONS

Bandwidth:	20 Hz to 50 kHz -3.0 dB
Woofer:	9.5-inch carbon paper sandwich cone 3-inch SD voice coil
Midrange:	6-inch doped polypropylene cone 2-inch SD voice coil
Tweeter:	1-inch double ring
Power handling:	250 watts music power
Sensitivity:	93 dB @ 1w @ 1 m
Nominal impedance:	8 ohms
Minimum impedance:	3 ohms @ 5.5 kHz
Break in time:	75 hours (63%), 400 hours (99%)

### DIMENSIONS & WEIGHT

Height:	47.6 in. (120.8 cm)
Width:	12.7 in. (32.3 cm)
Depth:	17.7 in. (45.0 cm)
Weight:	300 lbs (150 kg) / pair
Gross weight:	370 lbs (168 kg) / pair

### FEATURES

Connectors:	Furutech
Isolation Base:	Verity MASIS system c/w adjustable feet

### AVAILABLE FINISHES

Standard:	High gloss black piano
Special Order:	High gloss exotic wood finishes
